

AGRICULTURAL PROFILE UPDATE

APPENDIX 1

EXECUTIVE SUMMARY

STUDY AREA

The study area for this agricultural profile is Peterborough and Kawartha Lakes. The reporting is structured from the Statistics Canada Census Divisions, which are based on the area municipalities of:

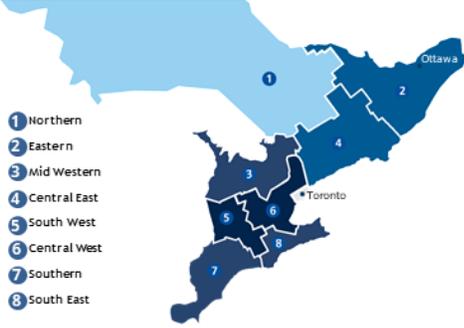

- Kawartha Lakes
- Peterborough
 - Township of Asphodel-Norwood
 - Township of Otonabee-South Monaghan
 - Township of Cavan Monaghan
 - Township of Selwyn
 - Township of Douro-Dummer
 - Township of Havelock-Belmont-Methuen
 - Township of Trent Lakes

STATISTICAL PROFILE - KAWARTHA LAKES

CHARACTERISTICS	KAWARTHA LAKES
NUMBER OF FARMS	<p>There were 1,146 farms in 2021, 1,265 in 2016 and 1,366 in 2011.</p> <p>There is a reported decrease of 220 farms (19.2% between 2011 and 2021).</p> <p>The significant decline in number of reported farms may be due to the change in how Statistics Canada defines a farm.</p>
AREA OF FARMLAND	<p>There were 277,793 acres of farmland reported in the 2021 census, 309,405 acres in 2016 and 326,092 acres in 2011.</p> <p>Area of farmland has decreased by 48,299 acres (15%) between 2011 and 2021.</p>
AVERAGE FARM SIZE	<p>Average Farm size in 2021 was reported as 242 acres, 245 acres in 2016 and 239 acres in 2011.</p> <p>Average area fluctuated from 239 Acres in 2011 to 245 Acres in 2016 with a slight decrease in 2021 to 242 Acres.</p>

CHARACTERISTICS	KAWARTHA LAKES				
FARMS CLASSIFIED BY TOTAL FARM AREA	Farm Area Class	2011	2016	2021	
	Under 10 acres:	36	45	25	
	10 to 69 acres:	253	238	247	
	70 to 129 acres:	410	356	320	
	130 to 179 acres:	161	134	132	
	180 to 239 acres:	148	141	116	
	240 to 399 acres:	160	166	148	
	400 to 559 acres:	74	67	59	
	560 to 759 acres:	47	46	39	
	760 to 1,119 acres:	40	32	21	
	1,120 to 1,599 acres:	14	17	17	
	1,600 to 2,239 acres:	15	11	12	
	2,240 to 2,879 acres:	3	10	6	
	2,880 to 3,518 acres:	4	1	2	
3,520 acres and over:	1	1	2		
LAND TENURE (OWNED AND RENTED)	The percentage of Farmland Area Owned and Rented has remained the same between 2011 and 2021 within Kawartha Lakes at 68% of land being Owned and 32% being Rented.				
FARMS BY MAIN FARM TYPE	<p>Cattle operations have increased in Kawartha Lakes since 2016. Cash crops and horse and pony farms show the most significant decline.</p> <p>The main commodities in Kawartha Lakes based on Number of Farms Reporting:</p> <ul style="list-style-type: none"> • 2011: Cash Crops (438), Cattle (411), and Miscellaneous Specialty (240). • 2016: Cash Crops (438), Cattle (367), and Miscellaneous Specialty (197). • 2021: Cash Crops (386), Cattle (396), and Miscellaneous Specialty (177). 				

CHARACTERISTICS	KAWARTHA LAKES
ESTIMATED FARM CASH RECEIPTS (BY FARM and COMMODITY)	<p>There has been a significant increase in farm cash receipts.</p> <p>The greatest percentage increases in farm cash receipts by commodity are Other Crops and Livestock (1483%), wheat (274% and Corn (113%).</p> <p>Cannabis is reported as Other Crops and Livestock and may explain the significant increase in this commodity classification.</p> <p>The decreases in farm cash receipts by commodity are Eggs (-100%) and Nursery (-37%).</p>
OPERATING REVENUE	<p>Total Operating Revenues increased from \$110,704,607 in 2011 to \$181,437,003 in 2021.</p> <p>Operating Revenues per Acre increased from \$339 per acre in 2011 to \$653 per acre in 2021.</p>
OPERATING EXPENSES	<p>Farm Operating Expenses Per Acre has seen an increase from \$321 per acre in 2011 to \$609 per acre in 2021.</p> <p>Farm Operating Expenses Per Farm has seen an increase from \$76,705 per farm in 2011 to \$147,509 per farm in 2021.</p>
GROSS PROFIT	<p>Gross Profit per farm decreased \$1103 between 2016 and 2021.</p>
FARM CAPITAL	<p>Average Farm Capital Per Farm has seen an increase from \$953,350 per farm in 2011 to \$1,476,127 per farm in 2016 to \$2,349,707 per farm in 2021.</p>
LAND PRICES (CENTRAL EAST REPORTING AREA INCLUDES KAWARTHA LAKES and PETERBOROUGH)	<p>Land prices in Central East (that includes the study area) have increased by 32% between 2011 and 2021.</p> <p>Land prices per acre in Central East rose another \$2,400 per acre between 2021 and 2022.</p> <p>Across Ontario, land prices in Central West and Southwest show the steepest price increases while the northern area reports the slowest increase.</p> 
FARM OPERATORS (NUMBER, AGE and CHARACTERISTICS)	<p>Total Number of Operators [All Farms] has seen a constant decline in the number of operators from 1,920 in 2011 to 1,105 in 2021.</p> <p>Total Number of Operators by Age [All Farms] has remained constant from 2011 to 2021 with the majority of operators being in the 55 year and older category.</p> <p>Average Age of Operators [All Farms] has increased slightly from 55.6 years in 2011 to 56.7 years in 2016 to 57.9 years in 2021.</p>

CHARACTERISTICS	KAWARTHA LAKES
OPERATING ARRANGEMENTS	Sole Proprietorship, although decreasing over time, has remained the preferred operating arrangement for farms in Kawartha Lakes. Over 60% of the farms reporting in 2021 are operating under a sole proprietor.
PAID LABOUR	<p>Data was only recorded in the 2016 and 2021 Agricultural Census.</p> <p>11% of farms have either full or part-time employees (131 of 1,146 farms).</p> <p>The number of operations employing seasonal or temporary workers declined from 26% to 13% (325 to 152 farms).</p> <p>The number of family members working in the farm unit is higher than the Provincial average with 24% in 2021. In Peterborough County the number is as high as 47% in Asphodel-Norwood and as low as 10% in Selwyn.</p>
FARMING PRACTICES	<p>IN-field winter grazing of livestock remained steady at around 202 farms.</p> <p>Land Practices of Shelterbelts or Windbreaks (Natural or Planted) within Kawartha Lakes has seen an increase from 345 (farms reporting) in 2011 to 585 (farms reporting) in 2021.</p>
SUCCESSION PLANNING	<p>821 farms out of 1,146 farms in Kawartha Lakes have no succession plan.</p> <p>Verbal succession plans are more prevalent than written succession plans.</p>
TECHNOLOGIES	<p>In Kawartha Lakes, automated guidance steering systems has increased 4%, GIS Mapping has increased 3% and 8 more farms are using robotic milking between 2016 and 2021.</p> <p>Adoption of new digital and robotic technology is quickly evolving within Ontario. Robotic milking equipment has seen a 112% increase in adoption from 2016 to 2021 provincially. Adoptions of GIS mapping system has increased by 58% from 2016 to 2021 provincially.</p>
RENEWABLE ENERGY	<p>Solar energy adoption across the study area has been significant and widespread with adoption rates generally above the provincial average.</p> <p>190 farms are producing renewable energy, 108 farms are selling it, 5 farms have wind power, 128 farms have solar, 51 have bioenergy, 48 have biomass combustion energy, 3 have biomethane, 2 have another type of bioenergy (other biogas) and 32 farms have geothermal.</p>
BUSINESS LOCATION COUNTS	<p>Agri-food businesses grew from 1,056 to 1,062 between 2016 and 2021. The number of businesses with employees grew by 20. The increases are seen in crop production operations (229 operations in 2016 to 324 in 2021). All other business types decreased over the same period.</p>

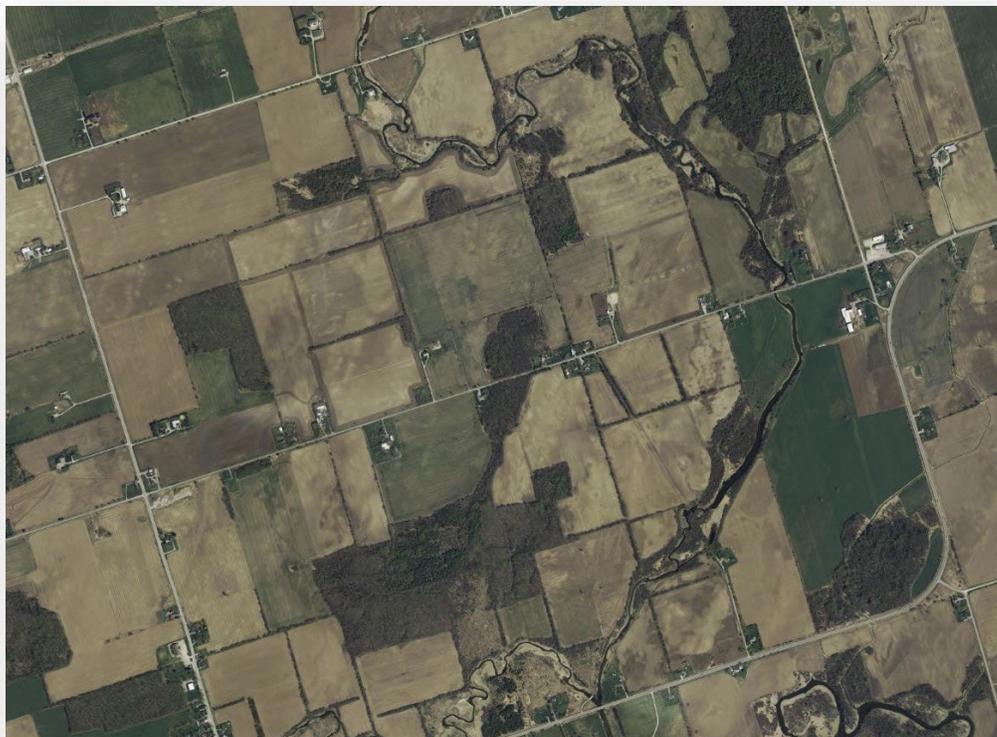

STATISTICAL PROFILE - PETERBOROUGH

CHARACTERISTICS	PETERBOROUGH				
NUMBER OF FARMS	<p>There were 863 farms in 2021, 941 in 2016 and 1,053 in 2011.</p> <p>There is a reported decrease of 190 farms (22.0%) between 2011 and 2021.</p> <p>The significant decline in number of reported farms may be due to the change in how Statistics Canada defines a farm.</p>				
AREA OF FARMLAND	<p>There were 180,372 acres of farmland reported in the 2021 census, 202,240 acres in 2016 and 228,936 acres in 2011.</p> <p>Area of farmland decreased by 48,564 acres (21%) between 2011 and 2021.</p>				
AVERAGE FARM SIZE	<p>Average Farm size in 2021 was reported as 209 acres, 215 acres in 2016 and 217 acres in 2011.</p> <p>A slight decrease during the census years from 217 Acres in 2011 to 215 Acres in 2016 to 209 Acres in 2021.</p>				
FARMS CLASSIFIED BY TOTAL FARM AREA	Farm Area Class	2011	2016	2021	
	Under 10 acres:	26	38	28	
	10 to 69 acres:	182	175	172	
	70 to 129 acres:	331	289	268	
	130 to 179 acres:	104	84	95	
	180 to 239 acres:	128	100	72	
	240 to 399 acres:	133	120	111	
	400 to 559 acres:	74	65	56	
	560 to 759 acres:	30	32	28	
	760 to 1,119 acres:	28	19	19	
	1,120 to 1,599 acres:	11	14	8	
	1,600 to 2,239 acres:	6	3	4	
	2,240 to 2,879 acres:	0	2	2	
	2,880 to 3,518 acres:	0	0	0	
3,520 acres and over:	0	0	0		

CHARACTERISTICS	PETERBOROUGH
LAND TENURE (OWNED AND RENTED)	The percentage of Farmland Area Owned and Rented has remained constant with at least 70% of the lands being owned.
FARMS BY MAIN FARM TYPE	<p>Cattle and sheep are the only farm types showing growth since 2011. Horse and ponies, cash crops and miscellaneous specialty farms show the greatest decline.</p> <p>The main commodities are:</p> <ul style="list-style-type: none"> • 2011: Cash Crops (351), Cattle (272), and Miscellaneous Specialty (198). • 2016: Cash Crops (319), Cattle (247), and Miscellaneous Specialty (166). <p>2021: Cash Crops (288), Cattle (282) and Miscellaneous Specialty (132).</p>
ESTIMATED FARM CASH RECEIPTS (BY FARM and COMMODITY)	<p>There has been a significant increase in farm cash receipts.</p> <p>The greatest percent increases in farm cash receipts by commodity are Other Crops and Livestock (1488 %), Eggs (324%) and Wheat (162%).</p> <p>Cannabis is reported as Other Crops and Livestock and may explain the significant increase in this commodity classification.</p> <p>The decreases in farm cash receipts by commodity are Nursery (-100%) and Dairy Products (-4%).</p>
OPERATING REVENUE	<p>Total Operating Revenues increased from \$78,543,529 in 2011 to \$116,692,862 in 2021.</p> <p>Operating Revenues per Acre increased from \$343 per acre in 2011 to \$647 per acre in 2021.</p>
OPERATING EXPENSES	<p>Farm Operating Expenses Per Acre has seen an increase from \$296 per acre in 2011 to \$584 per acre in 2021.</p> <p>Farm Operating Expenses Per Farm has seen an increase from \$64,339 per farm in 2011 to \$122,008 per farm in 2021.</p>
GROSS PROFIT	<p>Gross Profit per farm increased \$6,673 between 2016 and 2021. This trend is due to the significant increases in Otonabee-South Monaghan, Selwyn and Asphodel-Norwood.</p> <p>Otonabee-South Monaghan (\$19,921), Selwyn (\$8,910) and Asphodel-Norwood (\$7,379) experienced the largest increase in gross farm profit.</p> <p>Havelock-Belmont-Methuen and Trent Lakes no longer generate sufficient gross profit from their agricultural activities to be reported.</p>
FARM CAPITAL	Average Farm Capital Per Farm has increased from \$914,989 per farm in 2011 to \$1,266,461 per farm in 2016 to \$1,959,193 per farm in 2021.

CHARACTERISTICS	PETERBOROUGH
<p>LAND PRICES (CENTRAL EAST REPORTING AREA INCLUDES KAWARTHA LAKES and PETERBOROUGH)</p>	<p>Land prices in Central East (that includes the study area) have increased by 32% between 2011 and 2021.</p> <p>Land prices per acre in Central East rose another \$2,400 per acre between 2021 and 2022.</p> <p>Across Ontario, land prices in Central West and Southwest show the steepest price increases while the northern area reports the slowest increase.</p>
<p>FARM OPERATORS (NUMBER, AGE and CHARACTERISTICS)</p>	<p>Total Number of Operators [All Farms] has seen a constant decline in the number of operators from 1,460 in 2011 to 810 in 2021.</p> <p>Total Number of Operators by Age [All Farms] has remained constant from 2011 to 2021 with the majority of operators being within the 55 year and older category.</p> <p>The Average Age of Operators [All Farms] has increased from 56.5 years in 2011 to 57.3 years in 2016 to 58.7 years in 2021.</p>
<p>OPERATING ARRANGEMENTS</p>	<p>Sole Proprietorship, although decreasing over time, has remained the preferred operating arrangement for farms within Peterborough. Over 58% of the farms reporting in 2021 are operating under a sole proprietor.</p>
<p>PAID LABOUR</p>	<p>Data was only recorded in the 2016 and 2021 Agricultural Census.</p> <p>9% of farms have either full or part-time employees (79 of 863 farms).</p> <p>14% of farms in Otonabee-South Monaghan have paid employees.</p> <p>The number of operations employing seasonal or temporary workers declined from 36% to 19% (337 to 160 farms).</p> <p>The number of family members working in the farm unit is higher than the Provincial average with 20% in 2021. The number is as high as 47% in Asphodel-Norwood and as low as 10% in Selwyn</p>
<p>FARMING PRACTICES</p>	<p>Land Practices of Shelterbelts or Windbreaks (Natural or Planted) within Peterborough has seen an increase from 267 (farms reporting) in 2011 to 439 (farms reporting) in 2021.</p>
<p>SUCCESSION PLANNING</p>	<p>614 farms out of 863 farms in Peterborough have no succession plan.</p> <p>Verbal succession plans are more prevalent than written succession plans.</p>

CHARACTERISTICS	PETERBOROUGH
<p>TECHNOLOGIES</p>	<p>In Peterborough, automated guidance steering systems has increased 4%, GIS Mapping has increased 4% and 6 more farms are using robotic milking between 2016 and 2021.</p> <p>Adoption of new digital and robotic technology is quickly evolving within Ontario. Robotic milking equipment has seen a 112% increase in adoption from 2016 to 2021 provincially. Adoptions of GIS mapping system has increased by 58% from 2016 to 2021 provincially.</p>
<p>RENEWABLE ENERGY</p>	<p>Solar energy adoption across the study area has been significant and widespread with adoption rates generally above the provincial average. Trent Lakes has increased n from 3 to 10 sites (+233%) and Cavan-Monaghan from 9 to 18 sites (+100%).</p> <p>169 farms are producing renewable energy, 87 farms are selling it, 0 farms have wind power, 128 farms have solar, 33 have bioenergy, 32 have biomass combustion energy, 0 have biomethane, 2 have another type of bioenergy (other biogas) and 24 farms have geothermal.</p>
<p>BUSINESS LOCATION COUNTS</p>	<p>Agri-food businesses declined by 97. Crop production businesses increased by 31 and Food, Beverage & Tobacco Manufacturing rose by 5 businesses. All other business types decreased between 2016 and 2021</p>

AGRICULTURE BY THE NUMBERS

Agriculture is a key contributor to life within Kawartha Lakes. Economic activity that is generated by agriculture and related businesses significantly strengthens the community.

Kawartha Lakes physical characteristics are best suited for livestock operations that require foraging and pasturelands. All commodity groups benefit from a strong agricultural service network within the region.

Agriculture is an integral part of the City as it successfully optimizes resources and people to achieve a community that is innovative, diverse, balanced, sustainable and prosperous.

CITY OF KAWARTHA LAKES

TOTAL OPERATING REVENUES

Operating revenues have increased by \$70,732,396 or 63.8% over a 10-year period.

2011 \$110,704,607 **2016** \$149,554,820 **2021** \$181,437,003

OPERATING REVENUE PER FARM

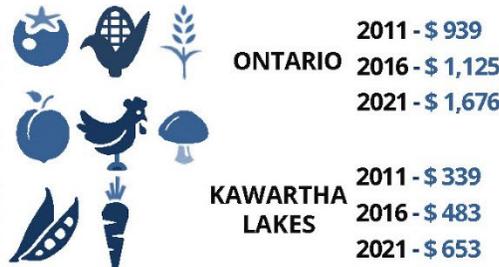

Operating revenues per farm has increased by \$77,279 per farm or 95.3% over a 10-year period.

2011 \$81,043 **2016** \$118,225 **2021** \$158,322

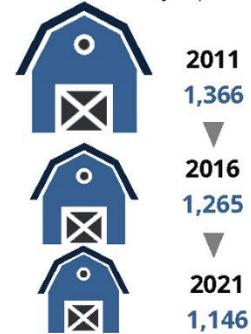

OPERATING REVENUE PER ACRE

Operating Revenue has increased for farmers by \$314 or 92.6% over a 10-year period.

NUMBER OF FARMS

Farms are disappearing. There are 16.1% fewer farms over a 10-year period.

AVERAGE FARM SIZE

Farms are remaining stable in size in Kawartha Lakes.

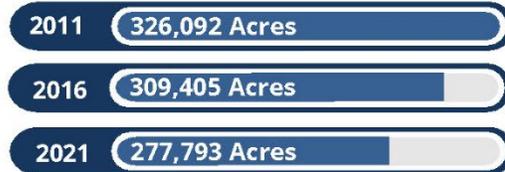

AVERAGE AGE OF FARMERS (2021)

Kawartha Lakes Farmers average age is higher than that of the Provincial Average.

NUMBER OF FARMLAND ACRES

Kawartha Lakes has lost 48,299 Acres of farmland within 10 Years.

NUMBER OF MALE AND FEMALE FARMERS

The number of farmers is declining in Kawartha Lakes.

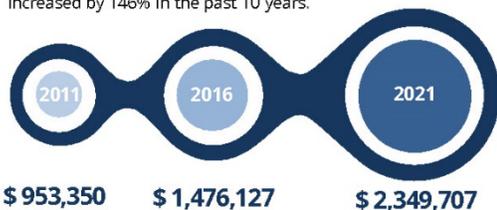

OWNED FARMLAND

Many farmers farm on land that is their own.

> AVERAGE FARM CAPITAL

The value and cost of land, buildings and equipment has increased by 146% in the past 10 years.

> LAND PRACTICES AND LAND FEATURES

Windbreaks and Shelterbelts help to protect lands from wind and erosion, crops from physical damage, and help irrigation efficiency.

> SUCCESSION PLAN FOR AGRICULTURAL OPERATION

Farm Operators may not have access to resources that can help them create a succession plan. Without a succession plan, farmland may be bought for non-agricultural development.

> OPERATING EXPENSES – PER FARM

Operating expenses on farm level has increased by \$70,804 per farm or 92.3% over a 10-year period.

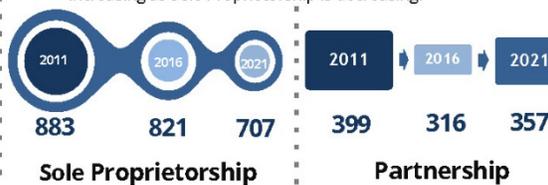

> OPERATING EXPENSES – PER ACRE

Operating costs per acre has increased by \$288 per acre or 89.7% over a 10-year period.

> OPERATING ARRANGEMENTS

Sole Proprietorship has remained the main form of operating a farm within Kawartha Lakes. Although, Partnership has been increasing as Sole Proprietorship is decreasing.

> NUMBER OF FARMS BY TYPE - 2021

* **Miscellaneous Specialty refers to:** Sheep Farming, Goat Farming, Horse & Other Equine Production, Fur Bearing Animal & Rabbit Production, Apiculture, All Other Miscellaneous Animal Production, Mushroom Production, Other Food Crops Grown Under Cover, Floriculture Production, Nursery & Tree Production and Maple Syrup & Products Production

** **Other Combination refers to:** Fruit & Vegetable Combination Farming and All Other Miscellaneous Crop Farming

> SUCCESSES

- Productive land base
- Average farm size appears to be stable
- Revenues continue to exceed operating costs

> CHALLENGES

- Increasing land prices and operating costs deter new entrants to farming
- Continual decrease in farmland available for production
- Increased farm operating costs

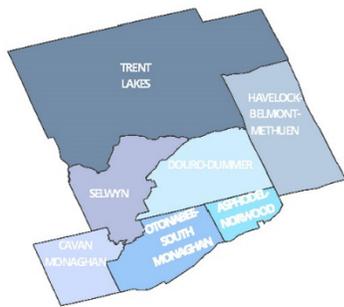

Peterborough County

AGRICULTURE BY THE NUMBERS

Peterborough County's Agriculture and Agri-food system is one of the main pillars of the economy due to its climate, land base, experienced operators, research capability, and skills that make it a leader in the production of agri-food products.

Peterborough County is best known for its pastured animals, especially beef and dairy. The limestone geographical features offer a challenge for row cropping and most other types of agriculture as it impacts soil conditions.

PETERBOROUGH COUNTY

TOTAL OPERATING REVENUES

Operating revenues have increased by \$38,149,333 or 32.7% over a 10-year period.

2011 \$78,543,529 **2016** \$94,282,602 **2021** \$116,692,862

OPERATING REVENUE PER FARM

Operating Revenue has increased for farmers by \$60,628 or 81.3% over a 10-year period.

2011 \$74,590 **2016** \$100,194 **2021** \$135,218

OPERATING REVENUE PER ACRE

Operating Revenue has increased for farmers by \$304 or 88.6% over a 10-year period.

NUMBER OF FARMS

Farms are disappearing. There are 22% fewer farms over a 10-year period.

AVERAGE FARM SIZE

Average farm size is slowly decreasing.

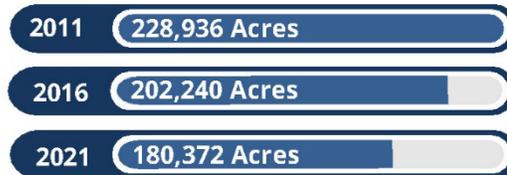

AVERAGE AGE OF FARMERS (2021)

Peterborough farmers' average age is higher than that of the Provincial Average.

NUMBER OF FARMLAND ACRES

Peterborough has lost 48,564 Acres of farmland within 10 Years.

NUMBER OF MALE AND FEMALE FARMERS

The number of farmers is declining in Peterborough County.

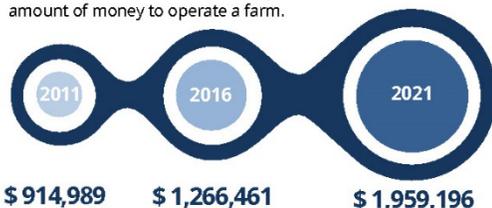

OWNED FARMLAND

Many farmers farm on land that is their own.

> AVERAGE FARM CAPITAL

The value and cost of land, buildings and equipment has increase by 114.1% in the past 10 years. It takes a substantial amount of money to operate a farm.

> LAND PRACTICES AND LAND FEATURES

Windbreaks and Shelterbelts help to protect lands from wind and erosion, crops from physical damage, and help irrigation efficiency.

> OPERATING EXPENSES – PER FARM

Operating expenses on farm level has increased by \$57,669 per farm or 89.6% over a 10-year period.

> OPERATING EXPENSES – PER ACRE

Operating costs per acre has increased by \$288 per acre or 49.3% over a 10-year period.

> SUCCESSION PLAN FOR AGRICULTURAL OPERATION

Farm Operators may not have access to resources that can help them create a succession plan. Without a succession plan, farmland may be bought for non-agricultural development.

No Succession Plan
614 Farms (67%)

Verbal Succession Plan Only
193 Farms (21%)

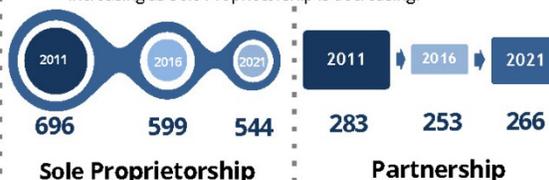

Written Succession Plan
56 Farms (6%)

1 or More Family Members
55 Farms (6%)

> OPERATING ARRANGEMENTS

Sole Proprietorship has remained the main form of operating a farm within Peterborough. Although, Partnership has been increasing as Sole Proprietorship is decreasing.

> NUMBER OF FARMS BY TYPE - 2021

* **Miscellaneous Specialty refers to:** Sheep Farming, Goat Farming, Horse & Other Equine Production, Fur Bearing Animal & Rabbit Production, Apiculture, All Other Miscellaneous Animal Production, Mushroom Production, Other Food Crops Grown Under Cover, Floriculture Production, Nursery & Tree Production and Maple Syrup & Products Production

** **Other Combination refers to:** Fruit & Vegetable Combination Farming and All Other Miscellaneous Crop Farming

> SUCCESSES

- Productive land base
- Average farm size appears to be stable
- Revenues continue to exceed operating costs

> CHALLENGES

- Increasing land prices and operating costs deter new entrants to farming
- Continual decrease in farmland available for production
- Increased farm operating costs

CHANGE IN THE FARM DEFINITION

A significant conceptual change to the main statistical unit used by Statistics Canada's Agriculture Statistics Program has been introduced for the 2021 Census of Agriculture: a "farm" or an "agricultural holding" (i.e., the census farm) now refers to a unit that produces agricultural products and reports revenues or expenses for tax purposes to the Canada Revenue Agency. Before 2021, a "farm" was defined as an agricultural operation that produced at least one agricultural product intended for sale.

The change in the new farm definition may result in farms being classified differently across farm types than in previous censuses.

As a result, comparisons with earlier census results should be interpreted with caution.

Statistics Canada - Canada's 2021 Census of Agriculture: A story about the transformation of the agriculture industry and adaptiveness of Canadian Farmers - <https://www150.statcan.gc.ca/n1/daily-quotidien/220511/dq220511a-eng.htm>

AGRICULTURAL ACTIVITY

The Agricultural activity module was a new addition to the 2021 questionnaire and is meant for respondents to indicate whether the operation fits under Statistics Canada's farm definition. It inquires whether the operation produces agricultural products, and whether the operator will be reporting sales or expenses for said products to the Canada Revenue Agency (CRA). The module consists of the following:

Will this operation produce agricultural products in 2021?

Examples of agricultural products include field crops, vegetables, fruit, livestock, horses, poultry, meat, milk, eggs, maple products, honey, wool, ornamental plants, sod, Christmas Trees, greenhouse products, mushrooms.

Yes - will this operation be reporting sales or expenses for these agricultural products to the Canada Revenue Agency (CRA)?

Other commodities produced using agricultural products grown or raised by this operation in 2021 (e.g., wine, meat products)

Statistics Canada - Canada's 2021 Census of Agriculture: A story about the transformation of the agriculture industry and adaptiveness of Canadian Farmers - <https://www150.statcan.gc.ca/n1/daily-quotidien/220511/dq220511a-eng.htm>

INCREASED USE OF DATA INTEGRATION

To enhance the information from the 2021 Census of Agriculture and to minimize respondent burden, Statistics Canada combined census data with information from other surveys or from administrative sources, where possible. For example, tax data from the Canada Revenue Agency was used to eliminate the need to ask respondents questions about the operating arrangement, revenues, and expenses. Also, the age and sex of each farm operator were obtained from the Census Population. Operators on the Census of Agriculture for whom no link was found had their information imputed with that of another Census Population person with similar characteristics.

With the use of the new processing environment, the Census of Agriculture concepts and variable for greenhouse content were standardized with those of the Annual Greenhouse, Sod and Nursery Survey, allowing for more direct confrontation, while setting the stage for possible data replacement in the future.

Statistics Canada - Guide to the Census of Agriculture, 2021 - [Guide to the Census of Agriculture, 2021 \(statcan.gc.ca\)](https://www150.statcan.gc.ca/n1/pub/26-669-x/2021001/article/00001-eng.htm)

NEW DISCLOSURE AVOIDANCE METHOD

Statistics Canada is required by law to protect the confidentiality of respondents. A data disclosure avoidance method is therefore required to protect the confidentiality of respondents' answers in published data.

In past censuses, the disclosure avoidance method used was based on a system that suppressed "sensitive" cells and their complements in data tables. While necessary, this method often led to the suppression of a large number of data points and significantly reduced the amount of available data, in particular for certain types of data and lower geographic levels. In the 2016 Census of Agriculture, about one-third of individual non-zero estimates (excluding farm-count estimates) were suppressed and thus unavailable to data users. Data was either considered publishable or not by the disclosure control method.

As part of Statistics Canada's user-centric focus to make more granular data available, the 2021 Census of Agriculture introduced a new disclosure control method called random tabular adjustment. Instead of suppressing cells in which there is a risk of divulging an individual respondent's data, this system intelligently changes the estimate in the cell to protect the respondent's data, allowing an estimate for virtually all cells to be released.

The implementation of the new disclosure avoidance method will affect the comparability of estimates with previous censuses.

Statistics Canada - Guide to the Census of Agriculture, 2021 - [Guide to the Census of Agriculture, 2021 \(statcan.gc.ca\)](https://www150.statcan.gc.ca/n1/pub/26-669-x/2021001/article/00001-eng.htm)

RANDOM TABULAR ADJUSTMENT (RTA)

Estimates may be missing from Census of Agriculture data tables for one of the following two reasons:

Data Suppression: one of the methods used to protect the information of individual members of the population is data suppression. This method was used for the 2016 Census of Agriculture. However, in 2021, data suppression was replaced with a new method called random tabular adjustment (RTA).

Data Quality: For the first time, the 2021 Census of Agriculture will publish a quality indicator for most of its estimates to account for the degree of uncertainty because of non-response, data processing and RTA in individual estimates. This indicator takes the form of a letter between A and F, where A-level estimates are considered to be the most reliable, and F-level estimates are considered to have so much uncertainty that they are too unreliable to be published. When an estimate cannot be published, the cell in the table will simply show the letter F.

Random tabular adjustment (RTA) identifies sensitive estimates and randomly adjusts their value, or adds noise, so an estimate remains confidential, allowing it to be released. In other words, instead of “suppressing” the data, the estimates are “perturbed.” The size of the adjustment is calculated to protect the confidentiality of the individual responses that contributed to the estimate.

After adjusting the value, Statistics Canada assigns a quality indicator (A, B, C, D, E or F) to the estimate to indicate the degree of confidence users can have in its accuracy. This indicator accounts for uncertainty throughout the data collection, processing, and confidentiality steps; it is not just for uncertainty because of RTA.

Random tabular adjustment (RTA) will not impact all estimates the same way. RTA looks at every cell individually to make a determination as to whether or not it contains sensitive information. While most Census of Agriculture cells do not contain identifiable information and will not need to have RTA applied, a number of cells will have RTA applied as they contain information that could be directly attributable to one or more of the individual values making up the total estimate in the cell.

When RTA is applied to a cell, the program will make a determination on the amount of the unique noise that will be added, and users will be unable to identify whether RTA has been applied to a cell or not. In this way, RTA provides a measure of protection for all cells in the table.

For the Census of Agriculture, RTA has not been applied to the following tables:

Characteristics of farm operators: age, sex and number of operators on the farm, Census of Agriculture, 2021 (Table 32-10-0381-01);

Characteristics of farm operators: farm work and other paid work, Census of Agriculture, 2021 (Table 32-10-0382-01).

In addition, RTA is not applied to count estimates, such as the number of farms with certain characteristics.

Statistics Canada - Frequently asked questions on random tabular adjustments (RTA)
https://www.statcan.gc.ca/en/statistical-programs/document/3438_D4_V4

FARM CASH RECEIPTS

Farm cash receipts measure the gross revenues of farm businesses. They include sales of crops and livestock products (except sales between farms in the same province) and program payments. Receipts are recorded when the money is paid to farmers. These do not represent their bottom line since farmers have to pay their expenses and loans and cover depreciation.

Farm cash receipts, are for the most part, based on monthly marketings and the monthly prices of various commodities. Marketings are quantities sold, using various units of measure.

Data are extracted from administrative files and derived from other Statistics Canada surveys or other sources. These data are subject to revision. The COVID-19 pandemic has also had some impact on normal collection operations. For certain commodities, it was not possible to collect data either in time or at all; in these cases, estimates were produced (e.g., fur, maple syrup). Revisions to these estimates will be made in future releases as data becomes available.
